BRINGING THE FUTURE

Forward-Looking Statements

This presentation information contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements involve certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied by these statements. These risks and uncertainties include factors detailed in the reports we file with the SEC, including those described under "Risk Factors" in our most recent Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q. These forward-looking statements speak only as of the date of this communication. We expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

It should also be noted that this information contains certain financial measures, including Adjusted EBITDA, Adjusted Earnings per Share, Adjusted Free Cash Flow, Net Leverage Ratio and Liquidity that are not required by, or presented in accordance with, accounting principles generally accepted in the United States, or GAAP. These measures are presented here to provide additional useful measurements to review our operations, provide transparency to investors and enable period-to-period comparability of financial performance. A description of non-GAAP financial measures that we use to evaluate our operations and financial performance, and reconciliation of these non-GAAP financial measures to the most directly comparable financial measures calculated and reported in accordance with GAAP, can be found in the appendix under "Reconciliation of Non-GAAP Measures."

AAM Overview

AAM - Quick Facts

Global-leader in design, engineering and manufacturing of automotive propulsion systems and technologies to support electric, hybrid and ICE vehicles

\$5.2B 2021 Revenue

~20,000 Employees

18 Countries

Nearly 85 Locations

14 Global Engineering and Tech Centers

- One of the leaders in hybrid and electric driveline solutions
- A Global Leader in

DRIVELINE

- Full-size pickup truck and SUV driveline systems
- AWD systems for crossover vehicles
- Damped gears, viscous dampers and rubber isolation pulleys
- Pioneer of disconnecting AWD Systems

METAL FORMING

BRINGING THE FUT

- Leading automotive forger in the world
- A Global Leader in
 - Forged Gears & Shafts
 - CVT Pulleys
 - Powdered Metal Connecting Rods
 - Aluminum Valve Bodies
 - Machined Helical Gears
 - Differential Assemblies
- Strong position in electrified propulsion components

TER

2Q 2022 AAM Financial Highlights

AAM Delivers Solid Results In A Difficult Operating Environment

Business Update

Mercedes-AMG

AAM's electric driveline technology powers AMG's first plug-in hybrid electric (PHEV) model, the <u>GT 63 S E</u> <u>PERFORMANCE</u>. AAM supplies the performance car's rear drive unit, a 2022 Automotive News PACETM Award finalist.

Electrification

AAM awarded multiple contracts to supply major global OEMs with highly engineered electric components including gears for front and rear electric drive units.

<u>Tekfor</u>

Completed the acquisition of Tekfor Group in June. The acquisition provides significant synergy potential, diversifies AAM's geographic and customer sales mix and increases AAM's electrification product portfolio.

Updated 2022 Financial Outlook (as of August 5, 2022)

2022 Financial Targets

Full Year Sales Adjusted EBITDA

Adjusted Free Cash Flow

\$5.75 to \$5.95 billion

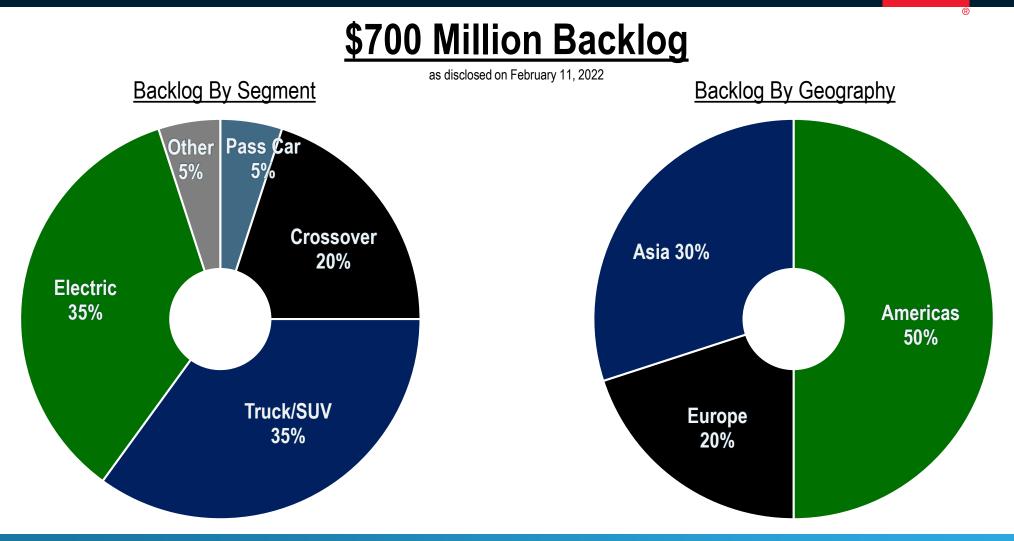

\$790 to \$830 million

\$300 to \$350 million

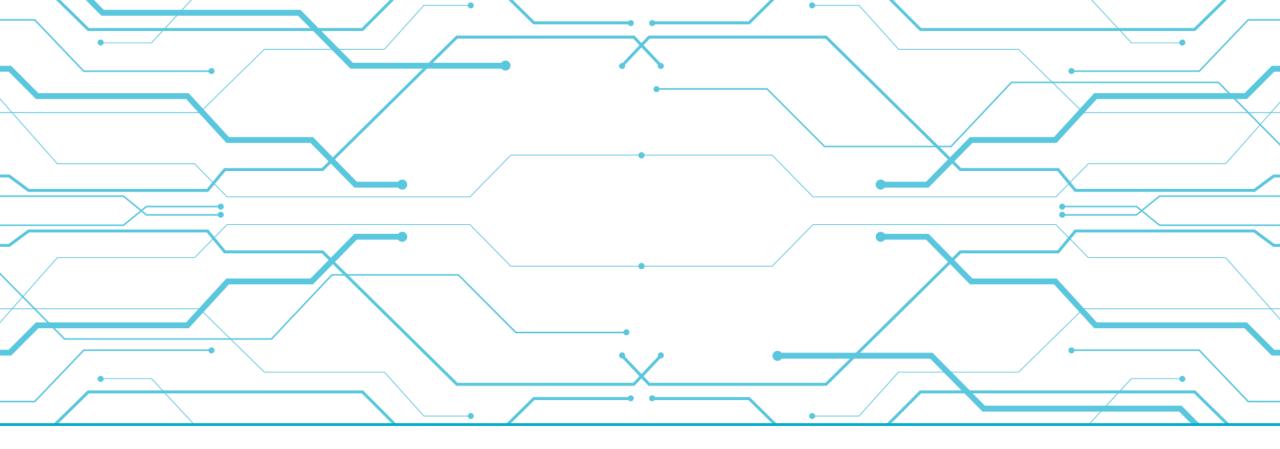

- The updated financial outlook includes the Tekfor acquisition (which became effective on June 1) cost synergies are on track for 2023
- These targets are based on North American light vehicle production range of 14.3 14.7 million units, current customer production and launch schedules and business environment
- Adjusted Free Cash Flow target assumes capital spending in the range of 3.5% 4.0% of sales
- AAM expects restructuring and acquisition-related cash payments to be between \$30 and \$40 million

Gross New Business Backlog

BRINGING THE FUTURE

Electrification continues to be a growing portion of AAM's new business backlog

Environmental, Social, and Governance

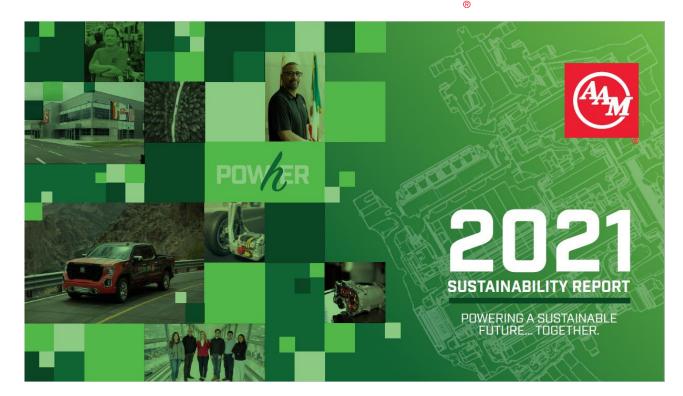

Sustainability

2021 Report

- New sustainability report was published in April 2022.
- Our vision is to power a sustainable future while providing value to our stakeholders.
- The mission is to advance global mobility through innovative technologies and sustainable solutions.
- Our focus is to deliver power and build a safer, greener and sustainable future for our associates, customers, communities and the environment.

BRINGING THE FL

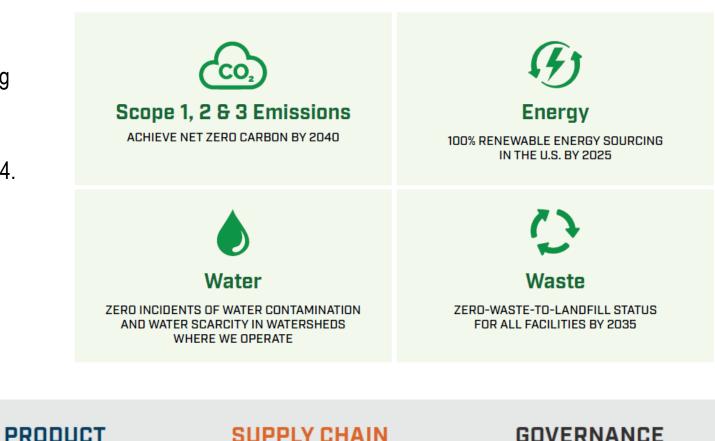

Committed To Net Zero Carbon Emissions

New Targets

ENVIRONMENTAL

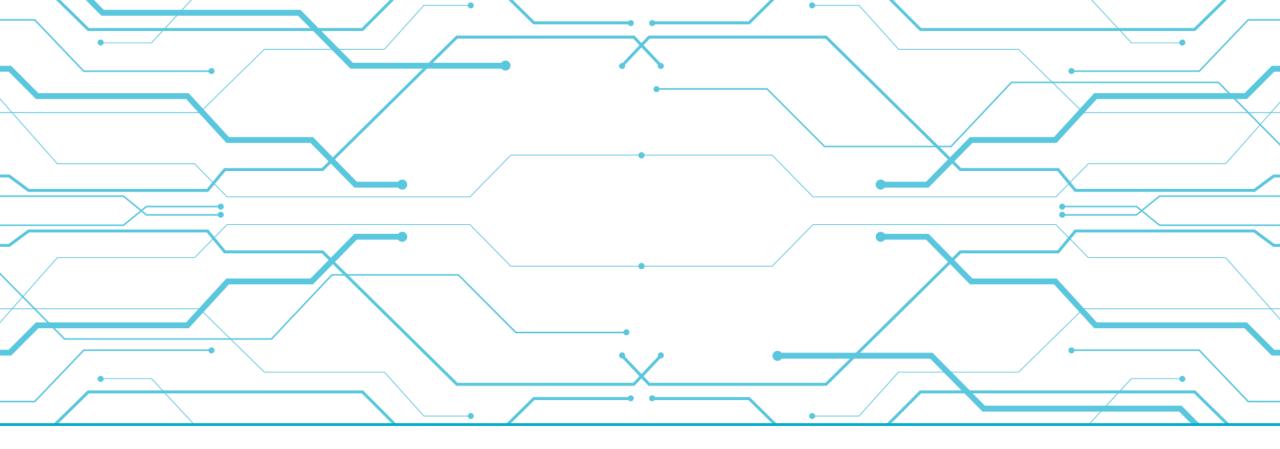

- We are focused on achieving profitable growth and doing so sustainably.
- We initially set goals to reduce GHG emissions, energy usage, and water consumption by 5% by the end of 2024.
- AAM achieved those goals ahead of schedule.
- We established new targets to guide AAM's global environmental sustainability initiatives.
- We applied for Science Based Targets initiative (SBTi) accreditation of our climate goals.

AAM is Positioned to Support All OEM Sourcing Strategies

AAM and REE Partnership

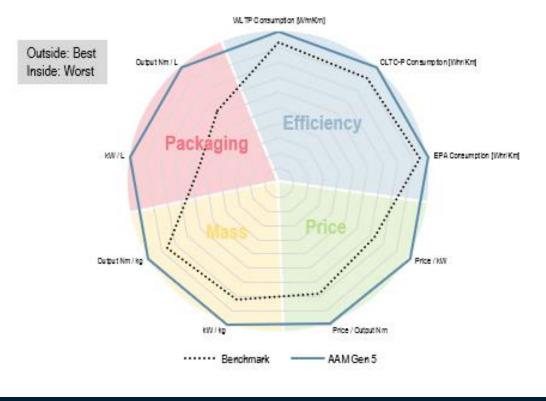

- AAM announced in November 2021 it secured an agreement with REE to supply high-performance 3-in1 electric drive units (EDU).
- The REEcorner integrates critical vehicle components between the chassis and the wheel to deliver significant functional and economic advantages.
- AAM's compact EDUs enables REE's integration of these chassis systems into the REEcorner module.
- Development of EDU at AAM's Advanced Technology Development Center.
- Prototypes delivered at the end of 2021.
- Full production planned for 2024.

In addition to the results reported in accordance with accounting principles generally accepted in the United States of America (GAAP) included within this presentation, we have provided certain information, which includes non-GAAP financial measures. Such information is reconciled to its closest GAAP measure in accordance with Securities and Exchange Commission rules and is included in the following slides.

Certain of the forward-looking financial measures included in this earnings release are provided on a non-GAAP basis. A reconciliation of non-GAAP forward-looking financial measures to the most directly comparable forward-looking financial measures calculated and presented in accordance with GAAP has been provided. The amounts in these reconciliations are based on our current estimates and actual results may differ materially from these forward-looking estimates for many reasons, including potential event driven transactional and other non-core operating items and their related effects in any future period, the magnitude of which may be significant.

Definition of Non-GAAP Measures

EBITDA and Adjusted EBITDA

We define EBITDA to be earnings before interest expense, income taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding the impact of restructuring and acquisition-related costs, debt refinancing and redemption costs, loss on sale of a business, impairment charges, pension settlements, unrealized gains or losses on equity securities and non-recurring items. We believe that EBITDA and Adjusted EBITDA are meaningful measures of performance as they are commonly utilized by management and investors to analyze operating performance and entity valuation. Our management, the investment community and the banking institutions routinely use EBITDA and Adjusted EBITDA, together with other measures, to measure our operating performance relative to other Tier 1 automotive suppliers. We also use Segment Adjusted EBITDA as the measure of earnings to assess the performance of each segment and determine the resources to be allocated to the segments. EBITDA and Adjusted EBITDA are also key metrics used in our calculation of incentive compensation. EBITDA and Adjusted EBITDA should not be construed as income from operations, net income or cash flow from operating activities as determined under GAAP. Other companies may calculate EBITDA and Adjusted EBITDA differently.

Adjusted Earnings Per Share

We define Adjusted earnings per share to be diluted earnings per share excluding the impact of restructuring and acquisition-related costs, debt refinancing and redemption costs, loss on sale of a business, impairment charges, pension settlements, certain accelerated depreciation, unrealized gains or losses on equity securities and non-recurring items, including the tax effect thereon. We believe Adjusted earnings per share is a meaningful measure as it is commonly utilized by management and investors in assessing ongoing financial performance that provides improved comparability between periods through the exclusion of certain items that management believes are not indicative of core operating performance and which may obscure underlying business results and trends. Other companies may calculate Adjusted earnings per share differently.

Free Cash Flow and Adjusted Free Cash Flow

We define free cash flow to be net cash provided by operating activities less capital expenditures net of proceeds from the sale of property, plant and equipment. Adjusted free cash flow is defined as free cash flow excluding the impact of cash payments for restructuring and acquisition-related costs and cash payments related to the Malvern fire, including payments for capital expenditures, net of recoveries. We believe free cash flow and Adjusted free cash flow are meaningful measures as they are commonly utilized by management and investors to assess our ability to generate cash flow from business operations to repay debt and return capital to our stockholders. Free cash flow and Adjusted free cash flow are also key metrics used in our calculation of incentive compensation. Other companies may calculate free cash flow and Adjusted free cash flow differently.

Net Debt and Net Leverage Ratio

We define net debt to be total debt, net less cash and cash equivalents. We define Net Leverage Ratio to be net debt divided by the trailing 12 months of Adjusted EBITDA. We believe that Net Leverage Ratio is a meaningful measure of financial condition as it is commonly used by management, investors and creditors to assess capital structure risk. Other companies may calculate Net Leverage Ratio differently.

Liquidity

We define Liquidity as cash on hand plus amounts available on our revolving credit facility and foreign credit facilities.

US SAAR

We define US SAAR as the seasonally adjusted annual rate of light vehicle sales in the United States.

Accelerated Depreciation

In the first quarter of 2021, one of our largest customers announced their intention to cease production operations in Brazil in 2021 as part of their restructuring actions. As such, we accelerated depreciation on certain property, plant and equipment beginning in the first quarter of 2021.

BRINGING THE FL
